Space Food!

In space there must be no crumbs! For instance, you could not take a package of crisps into space with you as any crumbs would float around in the capsule and get into your clothes!!

More importantly, these crumbs could cause damage and / or failure if they got into the spacecraft's computer equipment, and put the astronauts' lives at risk.

Therefore, they have to take 'gooey' food into space, which is basically freeze-dried food mixed with water to make a gooey paste!

WE designed
our own
planets.

Space Adventure
1st 2nd
I have been a
space explorer and
I have been to
Mars and I have
seen the Earth from
space. I have seen
the stars and the
planets. I have seen
the sun and the moon.
I have seen the
galaxies and the
comets. I have seen
the universe and
I have seen the
big bang.

Badles

Malachi Frederic

My characters are Me, Mark, Malachi and Frederic. Mark is in my story because he is my brother and he is courageous, strong and merciful. Malachi is a badie and he's good at sighting, always where's black and he's look's ugly. Frederic is Malachi's brother he is tough he like's where's sared T-shirts and blue trousers. The two brothers come from badland and they want to blow up Earth.

ELF: The opening of my story
1 paragraph

Me visiting space
"Wake up!" said Mum "It's Christmas!"
shouted Dad. I don't want to. I
mumbled. Mum and Dad walked
out the room. I said to myself
I better get up so I got up and
went down stairs and Dad
had put a box there and I
wondered what it was.

Flying to space
"Wake up!" screamed Mum "It's
Christmas!" shouted Dad "I don't
want to." I mumbled and put the
pillow on my face. Mum and Dad
walked out of my bedroom
and walked downstairs. Late
in the morning I got up and went
zooming down the stairs
and ran in the dining room
and under the enormous
Christmas tree was a box and
I wondered what was
inside.

"I'm going to open!" I said excited
So I peeked inside the box
there were screws bolts and
